DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because it's a one long sentence and in form of claim language which uses legal phraseology. The use of alternative language and/or for each limitation creates uncertainty to the scope of the invention. Correction is required. See MPEP § 608.01(b).

Drawings

3. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 1/30/02 has been acknowledged. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 23-44 are rejected under 35 U.S.C. 102(b) as being anticipated by Meek et al (5,808,558).

Regarding to claimed invention, Meek et al anticipates claimed invention a method for operating **electronic metering** (i.e. *universal utility usage data gathering system*), wherein system includes **drive means** (i.e., *AMR- automatic meter reading including the universal transponder having output drivers*), a program controlled **electronic control** for the driver (i.e., *electronic module container 20*), at least one **non-volatile write-read memory** (i.e., *RAM and EEPROM registers 52 and memory 53*), data interface (i.e., a Meter Interface Unit which interfaces between the universal transponder and the remote data gathering system), a data transfer means (i.e., communication port or leads 76, figure 5A), the method comprising:

One of writing and reading into **write-read memory** at least one of parameters specific see col. 23, lines 4-17; and

Remotely controlling the hand-metering device (i.e. *remote data gathering system as central office for Automatic metering and the portable reader as shown in item 2, col. 10, lines 11-27*).

Art Unit: 2863

Regarding to claimed wireless connection between the data interface of the metering device to the data interface of data transfer device, Meek teaches MIU system for communicating directly with the transponder via the data lines 17 and sends usage data directly back to a mechanical recording means 9.

Regarding to claimed radio or optical connection for data transfer means, Meek teaches multiple tapped reader loop antenna, which receive and transmit antenna at the same time, see col. 14, lines 22-28.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
